about 0.88 to 0.915 g/cm³ in an amount of from about 0 to 30 percent, based on total blend weight, with the blend being present in an amount of at least 70 weight percent, based on layer weight, in a layer having a thickness of at least about 0.6 mil.

REMARKS

The above amendments to Claims 1-4 merely delete the recitation of the first and second "components" and simply refer to the polymers which are the components. As such, the amendments to Claims 1-4 simplify the claims by deleting unnecessary language. Redundant language related to the "first heat shrinkable film" has also been deleted, to simplify the claims. The amendments contain no new matter. Should there be any questions or comments, the Examiner is invited to contact the undersigned at the telephone number provided below.

Respectfully Submitted,

Rupert B. Hurley Jr.
